About Me

I'm a software engineer using React-Native on Front-End, ExpressJS on Back-End.
I have been using React-Native and ExpressJS for 2 years.
I'm a young developer, who always like learning something new.

Experience

October 2017 – October 2018

SCHAFFFENGOTT

Front-End, Back-End, Embedded Engineer

I developed several mobile and server applications on SCHAFFENGOTT CO., Ltd, that is IoT Hardware Company. Using React Native, ExpressJS, AWS IoT and etc, I could develop as a PRODUCTION Level.

March 2017 – October 2017

PNU Apptive Club

Main Developer of Team 'Summer Time'

I worked as the main developer of the Summer Time team and developed mobile apps and servers. I led studies and seminars as a development manager in the club.

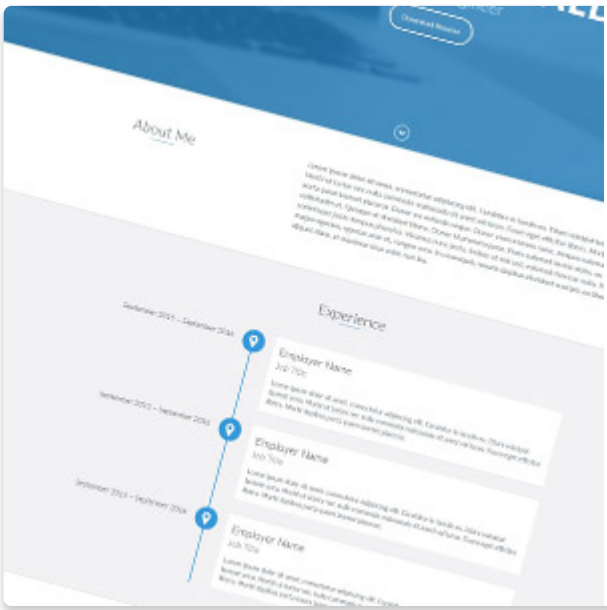
Education

Pusan National University

Engineering of computer science

I learned how to concentrate on my work with persistence at Pusan National University.

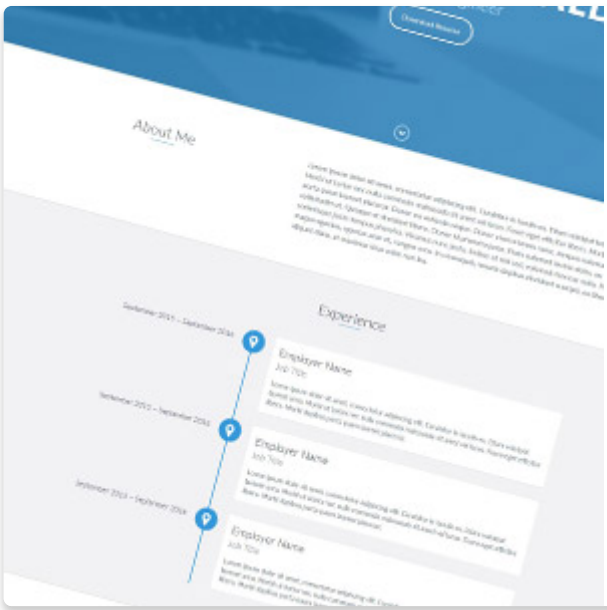
Projects



Project Name "Pretzel"

I led development a mobile apps and server which service matches the delivery service between students in university.

Used React-Native, ReactJS, ExpressJS, MySQL, AWS EC2, etc.

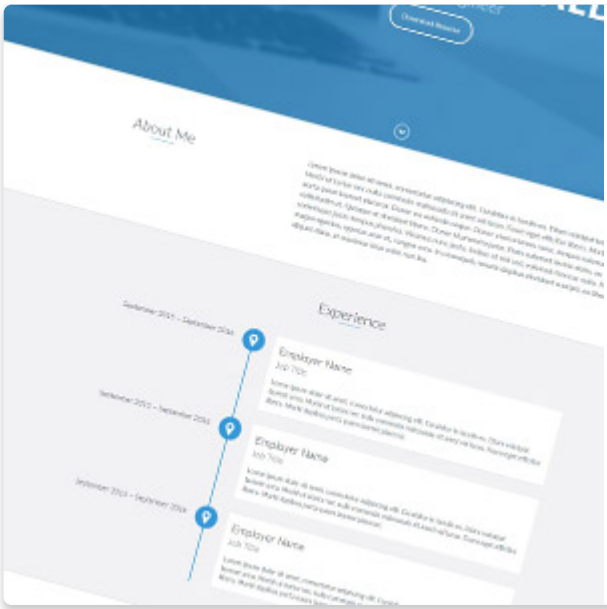


Several Toy Projects

I participated in many prototyping projects.

I developed IoT Hardware circuit, its firmware, mobile apps that can control the IoT device.

Used React-Native, ESP8266, Arduino, Raspberry Pi, NodeJS



IoT Production Projects

I led development a mobile apps, api server, MQTT server which service is notifying an emergency status and providing real-time monitoring.

Used React-Native, ExprssJS, AWS IoT, etc.

Skills

React-Native Typescript ExpressJS Firebase MySQL

Node.js Java C C++
